The Increased Price of Wheat

The Canadian Wheat Board has announced an increase of 50c a basic in the price of wheat to the millets. This action has been taken because Mr. Julius Barnes, of the United States Grain Corporation has succeeded in his attempt to have removed those war-time restrictions which prevented the free entry of Canadian wheat into the United States. The farmers of Western Canadamust appreciate what has been done for them by Mr. Barnes.

must appreciate what has been done for them by Mr. Barnes.

There was a time when there was loud discussion in Canada as to what effect free wheat between Canada and the United States would have upon the price of wheat. It was argued on the one side that the price of wheat at Minnespolis would be reduced to the Canadian level, and it was as emphatically asserted on the other side that the price of Canadian wheat would approach to the higher level usually obtaining in Minnespolis. Upon whichever side of the conteversy the merits of the case lay, those who argued against free wheat won in the reciprocity effection of 1911. Many things have happened since the year 1911, so many that we are living now in a new order of things altogether. Amongst the many changes that have taken place are those affecting trade in wheat as between Canada and the United States. Both countries have removed the duty on was signed, both countries maintained restriction which made free wheat impossible. Now, however, the United States Government has removed all those restrictions, while the Canadian authorities have not. We have now one-sided free wheat between the two countries, and the immediate result of this is an increase to the Canadian farmer of 50c a bushel in the price of his wheat.

Have the farmers of Western Canada changed their attitude in regard to free wheat? The

result of this is an increase to the Canadian farmer of 50c a bushel jit the price of his wheat. Have the farmers of Western Canada changed their attitude in regard to free wheat? The question sounds comical now that they have at last a concrete demonstration of the value of the American market. But the question is not as comical as it sounds, and for this reason there is not a chance in a hundred that the United States will keep its market open if Canada continues its, present method of selling wheat. The farmers of the United States, especially of the spring wheat growing areas, cannot be expected to look with favor upon the free entry of Canadian wheat into the dily ext he restrictions. And in making such an attempt their spokesme, any make to enignee the dily ext he restrictions. And in making such an attempt their spokesme, an make use of the kind of argument which has never failed to find a response in the United States.

They can argue that while Canada has removed the duty upon American wheat, it still maintains its restrictions, because American wheat and flour cannot come into Canada except, through a permit or a license from the Wheat Board. Not only so, but it can be argued—with perhaps still greater effect, that American millers cannot purchase Canadian wheat on commercial terms and by commercial methods; that if they attempt to purchase Canadian wheat they can deal only with a Wheat Board which has a statutory monopoly of shi Canadian wheat and that therefore, the Canadian market is not only closed as against United States wheat and flour by its licensing system, but also that this form of protection is reinforced and strengthened by the Canadian Government method of selling.

by the Canadian Government method of selling.

It is impossible to show that this argument is false. This being the case, it is unthinfable the United States will long keep her market opened to Canadian wheat if Canada confines it method of selling. True enough, the United States authorities have not objected so far as a present crop year is concerned, and they have not objected for the simple reason that they have not no logical foundation upon which to base such an objection so far as this year is concerned. Canada has a Wheat Board, they have a United States Grain Corporation. If Canada rearrietions still, they had restrictions until the other day. The operations of their Grain Corpo tion were so limited minec the beginning of the present crop year that it was no inconvenience to the for remove their restrictions against Canadian wheat in the middle of the crop year.

to remove their restrictions against Canadian wheat in the middle of the crop year.

The operations of the Canadian Wheat Board, are, so complicated that It cannot be expected that they should cease their operations before the end of the present crop year. So, far, therefore, as the handling of this year's crop is concerned, where is no reason why the United States should object to Canadia sentend of selling her wheat, but should Gradar ministrain her present method of sellings beyond this crop year, there is not a chance in a hundred that the United States while the presentation open free to Canadian wheat. Chance in a hundred that the United States will be the presentation open free to Canadian wheat.

If would be a curious development if, while the farmers is 1911, fought, and voted for, free wheat they should for 1920 adopt a method, of marketing Canadian wheat which would as inevitable.

The above article appeared in the Winnipeg Telegram December 29th Without expressing any opinion on it I think it is worthy of the most careful consideration.

JOHN E. BOTTERELL,

President Winnipeg Grain Exchange.

Bassano Municipal

ROY SMITH

FORD AGENT.

GARAGE AND AUTO LIVERY I. H. C. TITAN TRACTORS

BASSANO, Jan. 22nd, 1920.

Mr. Car Owner,

Dear Sir:-

Sometimes you have a tire that you know is worth repairing but you don't know where to take it.

There is a place right here in Bassano, for we have installed a large steam vulcanizing plant and can look after your wants in the way of repairing and re-treading in every particular.

. Bring in your automobile casings and tubes any time and we shall be glad to make free inspection of them. We will look them over and give you an estimate of what it will cost. If they are worth repairing we'll tell you. Sometimes a casing looks good but when it'is torn down for repairs, inside weakness appears and we know it would not pay to go sheed. If we find that condition we'll tell you and you won't be charged a centr.

Every now and then we see tires thrown away that could easily be repaired so that they would give two or three times the mileage necessary to pay for the repair.

Even if the casing is weak it may not be necessary to scrap it. Maybe an inside tire protector can be cemented in and the basing may run until it is entirely worn through.

If you have tread outs do not neglect them. Use your spare casing for a day and let us repair the outs. This can be done for a trifling cost and it may save you a blow-out or a lossened trea. The constant contact with the road forces water and dirt into the outs and in time the casing is ruined.

Get ready for Spring. Bring your tires to us at once and let us look them over. If you need new ones we can supply you as we carry all makes and sizes.

Yours very truly,

ROY SHITH.

the Information in the new year.

The Canadian Forestry association is the new year.

The Canadian Forestry association is the prime mover in the matter, and through its instrumentality, pressure is being brought to bear upon, the federal authorities to make a complete in being brought to bear upon, the federal authorities to make a complete change in the maingement and control of timber lands in the prairies of the provinces. Singlet artery is and control of timber lands in the prairies of the provinces, and a delegation recurry, waited upon Premier Drury, in On-tario, to ask that all timber and humber operations within that province he placed, under the direction of a provincial forester.

So far as Alberta is concerned, the Popelly aspociation is claiming that it wasterful and that the industry has been stoon much gives to a policy of the province of the province of the province of the province of the control of the province of the province of the province of the control of the province o

out making any glopision for re-foresting.

It has been felt that the public in-testes in the Alberta zerown lands. Is not being sufficiently protected by the extent methods, and in order to ef-fect, an improvement the appointment, in uniformally with, astlone airgoin taken, or in groupert in other pro-mines, the department of the futerior is understood to be considering the matter, and the Forestry association, it is said, infends to keep, it to the from.
